

Digital Piano

USER MANUAL

Thank you for purchasing this digital piano from our company.
Elegant and sophisticated, this digital piano is the perfect combination of the latest electronic technology.
♦This instruction manual must be read carefully before using this instrument.

Use DREAM audio source.

Its core uses the French DREAM top sound source, digital sampling, for your performance to bring realistic listening experience.

Qwerty keyboard

The 88-key QUS keyboard gives you the real feeling of playing on a grand piano.

Headphone jack

External headphone jack for easy playing without affecting others.

Special reminder:

This product is an electronic electro-acoustic instrument product, after the power in the speaker (two speakers or one of the speakers, or plug headphones) a little current sound is a normal phenomenon. During use, please stay away from "radio, TV, antenna receiver, router, refrigerator, TV, electrical appliances with motors and other RF electrical interference sources."

Installation Guide:

Installation steps:

1. Adjust the piano stand to the appropriate height, and there are two non-slip blocks on the left and right of the piano stand to prevent the piano from slipping.
2. Put the piano on the piano stand, pay attention to the ground should be smooth, to prevent the piano will not shake.

Note:

The piano stand is not included and needs to be purchased separately!

1 Power line connection

1. Connect the power cable according to the figure. Insert one end into the power socket in the operating board at the bottom of the piano and the other end into the 100-240V household power socket. (Figure 1)
2. If you do not use this product for a long time, unplug the power cable and keep it properly.

2 Audio input/output plug

1. Audio output jack can be external large speaker equipment. (Figure 2)
2. the audio input jack can connect the external sound source to the electric piano for playback. (Figure 2)

3 Headphone jack

Connecting the earphones will automatically cut off the output of the keyboard's built-in speakers, making it easy to play without disturbing others. This jack can also be used as an audio output interface. (Figure 3)

4 USB transfer interface

The USB transmission interface of this digital piano can be connected to the computer. Through the pre-installed music software on the computer, learn or play the keyboard for performance, composition, storage and other functions. The edited music and the accompaniment built in the music software can be connected to the digital piano through the software for playback, or play according to the accompaniment music. (Figure 4)

5 Pedal connection

Plug the pedal wire end into the round socket at the bottom of the piano to access 3 pedal sound effects! (Figure 5)

- Keyboard: 88 keys standard keys.
- Timbre: 128 timbre (001-128).
- Rhythm: 100 rhythms (001-100).
- Demonstration songs: 88 songs (01-88).
- Output function: three digit display.
- Timbre control: Double timbre. A double keyboard. A metronome.
- Chord Control: Sync. Single finger. Polyfingered chords.
- Recording control: powerful program recording playback function.
- Bluetooth connectivity.
- Foot control: Sound delay can be achieved. Delay sound. The sound reduction function.
- Other ports: USB port. Audio input/output interface, power interface. The headphone jack. Pedal interface.

1 Piano performance

1. Press the "Power" switch to the open position, "Digital display 001" lights up, you can enter the performance state.
 2. Play music on the piano keyboard.
 3. Turn off the power when not in use.
- The processor chip of this product is complex, similar to computer system, sometimes it cannot respond, please turn off the power switch and then open it to work normally.

2 Volume adjustment

Press "VOL+" or "VOL -" to increase or decrease the piano volume, please adjust the volume to a satisfactory position.

3 Instrument timbre selection

1. Press the "Tone" button to enter the tone mode.
2. Press "Select +" or "Select-" to select any timbre, and the corresponding timbre number will be displayed digitally.
3. Find the timbre you need in the appendix timbre list. A total of 128 tones.

NOTE!

- Whenever you turn on the digital piano, the initial preset is "piano" tone.

4 Rhythm selection

- "Start/Stop"
- 1, press the "Rhythm" button to enter the rhythm mode.
 2. Press "Select +" or "Select -" to select any rhythm, and the corresponding rhythm number is displayed.
 3. Press the rhythm "Start/Stop" button to start playing the selected rhythm. To stop the rhythm, press "Start/Stop" again.
 4. Find the rhythm you need in the appendix rhythm list. There are 100 different rhythms.

5 Beat speed control

1. Press the "TEMPO" button and then "Select+" or "Select-" to adjust the speed.
2. Speed control options (30-240). After power-on, the default value is in paragraph 120.
3. Press and hold "Select +" to continuously increase the speed, and press and hold "Select-" to continuously reduce the speed.

6 Chords accompaniment

1. Select the rhythm you want to play, specifically refer to the fourth point "rhythm selection" operation.
2. Press the "Chord" button to enter the chord state.
 - The chords with multiple single fingers are used. If the chords with multiple fingers are played, the piano responds to the chords with multiple fingers. Where the playing method does not conform to the multi-fingered chord, the response is identified by the single-fingered chord.
3. Playing chords can be played on the accompaniment keyboard (1-34 keys from left) according to different fingerings.
4. Press the "Chord" button again to close the chord state.

Automatic accompaniment keyboard

7 Synchronous start

Before starting, first choose the rhythm to use, set the speed value and select the chord accompaniment.

1. In the rhythm state, press the "Sync" button to make it enter the synchronous startup standby state.
2. Play any key, the accompaniment will automatically start playing.
3. To cancel the synchronization state, press the "Start/Stop" button.

8 Set/force function

1. Press the "Setting" button for the first time, and then press "Select +" or "Select -" to select the force to open or close.
2. Press the "Setting" button a second time, and then press "Select +" or "Select -" to select a different rhythm volume (1-16).
3. Press the "Setting" button for the third time, and then press "Select +" or "Select -" to select different shifts (-12 —12).

9 Metronome function

Press the "BEAT" button to activate the metronome function, display the current beat digitally, and press the button again to change the number of beats accordingly (1/4-2/4-3/4-4/4-off)

10 Built-in demo

1. Press the "DEMO" button to display the number of the current demonstration song and start playing the demonstration song. Press this key again to stop.
2. To enter the demonstration song mode, you can also select different demonstration songs by "Select+" and "Select-".
3. Find the song you need in the appendix song list.

NOTE!

- The product's built-in music library contains 88 songs. The built-in music can be played and enjoyed, or the melody can be followed on the keyboard with the learning function.

11 Recording function

1. Keyboard note recording: Press the "REC" button to enter recording mode and play the keys to enter note recording. Press the Record button again to stop recording.
- Keyboard note recording mode can change the "TONE" to record, can record 10000 notes.
2. Playback: Press the "PLAY" button to play the recorded notes.

12 Dual keyboard

1. First enter the tone mode and select a musical instrument as the main tone.
2. Press the "SPLIT" button to enter the split tone selection mode.
3. Use the "Select +" button or "Select -" to select another instrument as the split tone.

4. Play notes on the keyboard. At this time, the left and right sides of the keyboard emit corresponding musical instrument sounds.
5. Press the "SPLIT" button again to cancel the keyboard split and return to the normal keyboard state.
- Using the dual keyboard function, you can assign two different timbre (main and split) to each end of the keyboard, so you can play one timbre with your left hand and the other with your right hand for an ensemble effect.

Double keyboard

13 Dual tone

1. First enter the tone mode and select a musical instrument as the main tone.
2. Press the "DUAL" button to enter the second tone selection mode.
3. Use the "Select +" button or "Select -" to select another instrument as the second tone.
4. Play notes on the keyboard, at this time playing the keyboard can simultaneously emit two corresponding resonant timbre.
5. Press the "DUAL" button again to stop the function and return to the normal tone state.
- The use of double tone function can mix two different tone colors together to make a common sound, can be mixed arbitrarily, to create a new tone of musical instrument resonance.

14 Bluetooth connection

1. Audio Bluetooth: Open the Bluetooth function of the mobile phone, pair the corresponding Bluetooth name, enter the password "8888" Bluetooth connection successfully, you can play music on the piano.
2. Data Bluetooth: Open the mobile phone blue function, pair the corresponding Bluetooth name, and use the music APP of the mobile phone and other devices after the Bluetooth connection is successful. Practice songs on piano games.

**Power**

This product can be powered by standard indoor wall sockets, please use only 3C certified power adapters that meet the standard requirements. When not in use temporarily, please turn off the power. When not in use for a long time, please unplug the power cable and keep it properly.

**Mark**

In order to ensure your safe and correct use of the product, to prevent harm to users and others and financial damage, this manual and the product are marked with a series of safety marks. The symbols and their meanings are as follows:

**Warning**

This mark indicates that there is a potential danger of death or serious injury if the mark is ignored and the product is incorrectly operated.

**Attention**

This mark indicates that there is a potential danger of personal injury or other financial damage if the mark is ignored and the product is operated incorrectly.

Sign sample

This triangle flag () represents what users should be aware of. (The left example is careful electric shock)

Circular signs () with slash lines indicate prohibited items. A graphic representation in or next to a sign indicating specific prohibited content. (For the left example, disassembly is prohibited)

Black dots () indicate things that must be observed. The icon in this sign represents the content of a specific, subject matter to be complied with. (The left example is that the power plug must be pulled out of the socket)

**Warning****Smoke, smell, overheating**

When this product smoke, smell or overheat, use may lead to fire and electric shock hazard. If the above situation occurs, perform the following operations immediately.

1. Turn off the power.
2. Remove the plug from the power socket.
3. Contact your distributor

The power cord

- Improper use of power cables may cause fire and electric shock.  The following precautions must be observed.
 - The special power cord specified for this product must be used. 
 - Use an AC power supply whose output voltage is within the rated of the household voltage.
 - Do not overload power sockets and power extension cords. 
- Improper handling of power cables, resulting in damage or breakage, may cause fire and electric shock. The following precautions must be observed.
 - Do not place heavy objects or heat the power cord. 
 - Do not attempt to modify or excessively bend the power cord.
 - Do not twist or pull the power cord.
 - If the power cable or plug is damaged, replace it with a power cable of the same specification and type. 
- Do not touch the power cord and plug with wet hands, otherwise there is a risk of electric shock. 

- Please use the power cord where water will not splash. Water is a hazard of fire and electric shock. 

- Do not place vases or any other containers containing water on this product. Water is a hazard of fire and electric shock. 

- Do not allow minors to plug or touch the power cord or connecting plate. Minors have no electrical safety knowledge and may cause electric shock. 

**Attention**

- Improper use of power cables may cause fire and electric shock. The following precautions must be observed.
 - Do not place the power cord near the furnace or other heat source.
 - Do not pull the power cord when removing it from the power socket. Must hold the plug body. 
 - The power cord plug must be inserted into the power socket to the end.
 - Make sure the power supply is switched off before connecting or cutting off the power cord. 
 - Unplug the power cord from a wall outlet in the event of a thunderstorm or before traveling or other extended absences.
 - At least once a year, unplug the power cord from the wall outlet and clean the dust that accumulates around the plug.

Do not burn this product

Do not expose the product to fire. Otherwise, wood products will burn and their internal electronic components will explode, resulting in fire and injury risk.

**Water and foreign matter**

Water, other liquids and (metal sheet, etc.) entering the product may cause fire hazard and electric shock.

If the above situation occurs, perform the following operations immediately.

1. Turn off the power.
2. If the power cord is being used for power supply, unplug it from the wall outlet.
3. Contact your dealer.

Dismantlement and transformation

Do not disassemble or modify the product in any way. Otherwise, there is a risk of electric shock, scalding or other personal injury. Delegate all inspections, adjustments and maintenance to your dealer.

**To fall or hit.**

There is danger of fire and electric shock after the product is damaged by falling or strong impact. If the above situation occurs, perform the following operations immediately.

1. Turn off the power.
2. If the power cord is being used for power supply, remove it from the wall outlet.
3. Contact your dealer.

Plastic bags

Do not allow anyone to put this product packaging plastic bag on the head or into the mouth, otherwise there is a risk of suffocation, special attention should be paid to families with young children.

**Keep your distance from this product and support**

Climbing on the piano body or its support can cause it to topple or damage, especially for families with young children.

**Put**

Avoid placing the product on uneven surfaces or in any other unstable place. Otherwise, the product will fall, and there is a risk of injury.

**Product movement**

Before removing the product, unplug the power cord plug from the wall outlet and unplug all other cables and connectors. Otherwise, it may lead to wire damage, fire and electric shock risk.

**Clean**

Before cleaning the product, remove the power cord plug from the wall outlet, otherwise there is a risk of fire and electric shock.

**Interface**

Only specified devices and devices can be connected to the interface of this product. Danger of fire and electric shock when connecting undesignated equipment or devices.

**Location choice**

Avoid placing the product in the following places. Otherwise there is a risk of fire electric shock.

- A hot or dusty place.
- Kitchen or other smoky area.
- Exposure to direct sunlight, or any other place that will cause high temperature of the product.

Volume

Do not play music at high volume for a long time. Be careful when using headphones. Too high a volume can damage your hearing.

**Weight**

Do not place heavy objects on the product. Otherwise, the top of the product will be too heavy, causing the product to tip over or make the objects on it fall off, which may lead to the risk of injury.

**Proper assembly of bracket**

Improper assembly of the bracket will cause it to tip over, causing the product to fall, which may lead to the risk of injury.

Therefore, assembly must be carried out in accordance with the instructions in the accompanying manual to ensure that the product is properly mounted on its bracket.

Safety warning!

Electrical appliances will be aging after long-term use.

It is recommended to test the products regularly after the one-year warranty period is exceeded.

If there is any abnormal phenomenon, please suspend the use and hand over to professional maintenance personnel to avoid safety accidents!

Please cut off the power after each use!

Attachment list

Name	Number
Power charger	1 PCS
Body	1 PCS
Music stand board	1 PCS
Instructions	1 PCS

Instrument parameters

Keys: 88	Intonation: ≤ 3 the sound
Range: A2 ~ C5	Output power : $\geq 15W \times 2$
Style: Portable upright piano	Power supply: DC 12V2A 50/60Hz

Troubleshooting

Fault	Possible causes/Solutions
When the power is switched on, a puffing sound is produced	This is a normal phenomenon, please do not worry
When the power is turned on, pressing the keyboard does not make any sound.	Make sure the main volume control is set in the appropriate position. Or check whether there is any other device connected to the earphone output jack, so the built-in speaker system automatically disconnects
Note quality is slightly different from note quality under the same timbre	This is a normal phenomenon, due to the different timbre sampling range and produce different sound quality
When using the duration function, some timbre duration is long, and some timbre duration is short.	This is normal because the duration of the different timbre of the instrument has been set to the maximum length
The volume is too small	Make sure the master volume control is set in the appropriate position
Some MIDI data cannot be transmitted correctly (even when the MIDI cable is properly connected)	This is a normal phenomenon and is related to the initial setting state of the piano
When using mobile phone or mobile phone close to the horn noise phenomenon will occur	Mobile phones can cause interference. To avoid this noise, turn off your mobile phone or use it away from your keyboard
The pitch of the keyboard does not match the position of the keyboard when it is played.	You may turn on the double keyboard or move the function, at this time turn off the double keyboard or move reset to zero; You can also turn off the power switch to restart.
You can't change the tone while playing, and the pitch of the keyboard doesn't match the actual position of the keyboard	You may turn on the double keyboard function, turn off the double keyboard function at this time; You can also turn off the power switch to restart.
Playing demo song sound distortion or discontinuous	The possible reason is that the over-heated circuit self-protection system of the power amplifier is started due to the long time of high-power playback. At this time, it can be recovered by turning down the volume or turning off the power for a period of time
There are two timbre occurring at the same time	The likelihood is you opened double tone function, close double tone function right now can

Note: The equipment has been tested and complies with national safety regulations and EMC and other relevant regulations. Radio communication may cause interference to the equipment, or the equipment may affect radio or TV reception. Users should take one or more of the following measures to correct interference:

- Reposition or replace the receiving antenna.
- Increased direct isolation between device and receiver.
- The receiver connects the device to sockets on different lines.
- Consult dealers or experienced radio/television technicians.

Warning user: Any unreasonable changes or modifications may affect the normal operation of the device.

THE warranty

1. Under normal circumstances, our factory guarantees the products free of charge for one year from the date of purchase.
2. During the warranty period, if there is any damage caused by use, storage, improper or self-disassembly, the material fee shall be charged accordingly.
3. If the warranty period exceeds, the cost shall be charged accordingly.
4. Please contact the dealer directly for repair service.
